SMART FARMING IN YOUR HANDS

Scan your crops, detect diseases,
and get instant solutions with
AgriScanAI

www.agriscanai.co.ke

AgriScanAI is an offline-first, AI-powered solution that helps farmers diagnose crop pest and diseases using AI technology, get expert farming advice, track financial expenses, income and yields, and accessing weather and farming insights. Everything you need is in one simple app.

✓ **Crop Disease Detection**

Detects crop diseases instantly using your phone camera

✓ **AI Chatbot**

Get expert help anytime with the built-in AI assistant

✓ **Farm Tracking**

Track your finances, expenses, and yields easily

✓ **Smart Insights**

Access weather and crop recommendations to plan better

MISSION

To provide farmers with innovative AI tools that detect crop diseases, give expert guidance, track farm activities, and offer actionable insights, helping them grow healthier crops and increase productivity.

VISION

To be the leading AI-powered farming assistant in Africa, ensuring that every farmer has access to smart, reliable, and practical technology for a sustainable and profitable future.
